

## HEALTH & SAFETY POLICY

### **Cyclotech Limited**

It is the established policy of Cyclotech Limited to carry out its business activities with the highest priority accorded to the Health and Safety of its employees, its customers and its sub-contractors meeting its obligations under the Health & Safety at Work Act 1974 (Section 2), as far as reasonably practical. All aspects of our business shall be conducted with Health and Safety as the single most important consideration.

Adherence to this policy involves every aspect of the Cyclotech Limited business and the company will provide information, instruction and supervision for employees and review and revise this policy, particularly as the business changes in size. To ensure this, the policy and the way in which it has operated will be reviewed every year. It is therefore an essential requirement that each employee conforms and works to the authorised procedures which make up the Health & Safety Manual and that Cyclotech Limited provide the information.

It is important that all employees understand and meet the documented requirements. They must also recognise their responsibility to identify problems and initiate, recommend or provide solutions through designated channels for their own health and safety and that of others they work with and the Board of Directors of Cyclotech Limited fully endorse and publish this manual in the knowledge that its Health & Safety performance depends on the everyday actions of those in its employ.
